YEARS 2022-2023

MISSION • VISION

MISSION

To give animals used in research and situations of harm, a second chance at life.

To advocate for non-animal use in science.

VISION

To see the end of animal testing.

CORE VALUES

COMPASSION

We value the lives of the animals and people we work with and meet everyone exactly where they are.

RESPECT

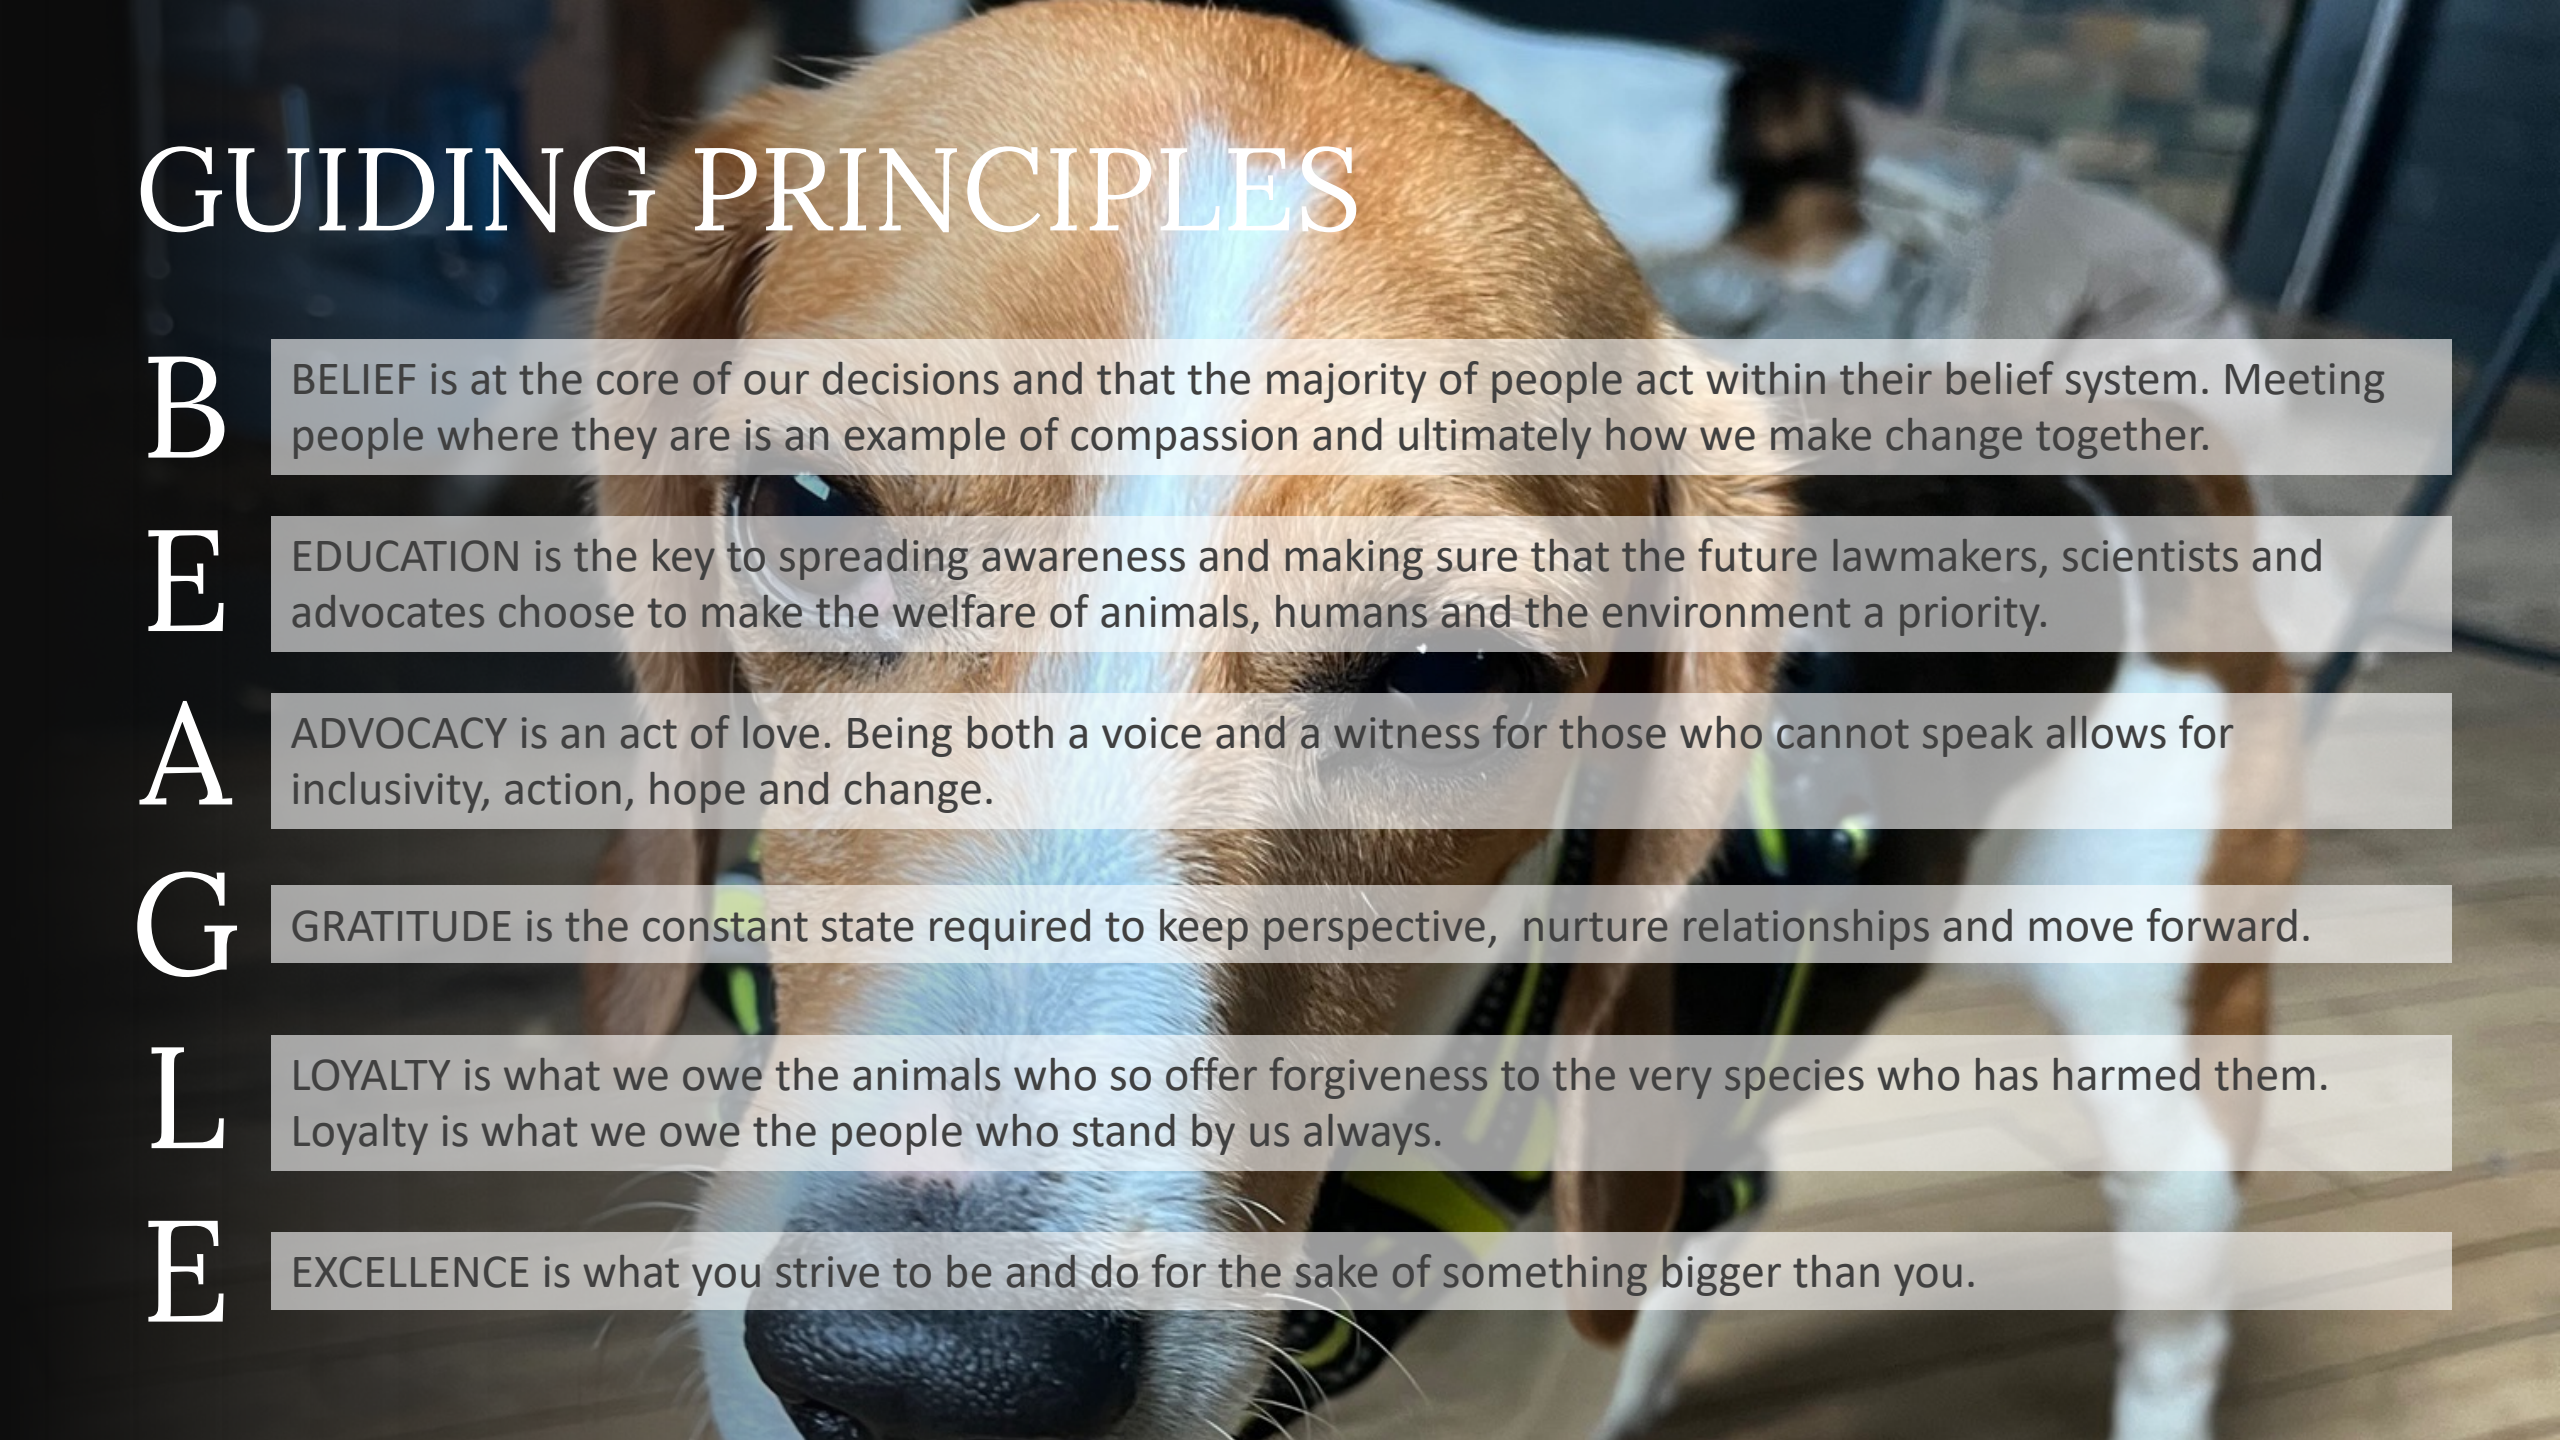

We treat all beings with dignity, fairness, and empathy. We value inclusivity.

COLLABORATION

We value teamwork and actively create partnerships that will increase our ability to save more lives.

INTEGRITY

We make ethical, transparent and well-intentioned decisions and are clear about making animal welfare a priority.

GUIDING PRINCIPLES

B BELIEF is at the core of our decisions and that the majority of people act within their belief system. Meeting people where they are is an example of compassion and ultimately how we make change together.

E EDUCATION is the key to spreading awareness and making sure that the future lawmakers, scientists and advocates choose to make the welfare of animals, humans and the environment a priority.

A ADVOCACY is an act of love. Being both a voice and a witness for those who cannot speak allows for inclusivity, action, hope and change.

G GRATITUDE is the constant state required to keep perspective, nurture relationships and move forward.

L LOYALTY is what we owe the animals who so offer forgiveness to the very species who has harmed them. Loyalty is what we owe the people who stand by us always.

E EXCELLENCE is what you strive to be and do for the sake of something bigger than you.

INSPIRATION

WHAT MAKES US DIFFERENT

The Beagle Alliance is the only organization in Canada dedicated to animals, specifically dogs, in research.

We are both a foster based rescue and an advocacy organization.

We are both a voice for change and a soft-landing place for the rest of their lives.

PASSION

THE ANIMALS WE SAVE

The animals we find homes for have been harmed and would have otherwise been euthanized.

We get them out of harm's way, whether after study or after neglect.

We get them to safety and then we work on individual rehabilitation.

ANIMAL WELFARE

REFERRING to the PHYSICAL and PSYCHOLOGICAL WELL-BEING of an ANIMAL

The Beagle Alliance is an animal welfare organization whose primary focus is on the advocacy and care for animals in science. This includes:

Advocacy and education about the care of animals while in facilities, the petition for release of eligible animals and for the critical review and change to current regulations and legislation.

The advocacy and education about new approach methods in research, the efficacy of the animal use model for the welfare of both animals and humans with regard to animal testing.

The promotion of cruelty free consumerism and the creation of programs for the students who will go on to be the next animal welfare advocates, scientists, teachers, lawmakers and legislators.

We do not condemn, judge or blame animal care or laboratory workers, scientists or government agencies.

We are inclusive and DO engage in conversation and the creating of community where belief systems are valued and where we believe respectful conversation will change minds.

Dr. Katie Lawlor (Pet Loss)

Kim Paschen (Leaping Bunny Program)

Liz Murdoch (Talking With The Dogs)

Mallory Cormier (Save the Buns and Justify), Madeline Krasno and Lindsay Oliver (Justify)

Monica Engebretson (Cruelty Free International)

AWARENESS PROGRAM

THE FUTURE

Our program, originally proposed in 2022, has expanded and will be proposed this semester as a volunteer credit program.

Premise: Students are the future lawmakers, advocates, scientists, government officials and consumers.

FOSTERS AND ADOPTERS

THE REASON

We know that rescue would not be possible without our fosters and adopters.

We make ourselves available 24/7, we promise transparency, education, experience and continual support.

We expect communication, cooperation, patience and the willingness to hear their stories.

We know that rescue would not be possible without our fosters and adopters.

Lab beagles get second chance at life in Manitoba

KEY EVENTS

2022

Speaker Animal Law Conference
Animal Welfare Foundation of Canada Grant Award
Individual (non-laboratory) Rescues
Envigo Breeding Facility Rescue with Cage To Couch

2023

Exhibitor Humane Canada Summit for Animals
Exhibitor 12th World Congress on Alternatives and Animal Use in the Life Sciences
Speaker Vote Animal Rally
Speaker and Moderator North American Animal Law Conference
Individual (non-laboratory) Rescues
Spring Break (laboratory testing) Rescue with Barc's Rescue Calgary
Freedom 10 (laboratory testing) Rescue with Cage To Couch
Free Fallin' (laboratory testing) Rescue with Cage To Couch
Local and International Media Coverage
Guest Dog Research Exposed Podcast

The Beagle Alliance offers our deepest gratitude to ERIC AND DANA MARGOLIS
- The Margolis Foundation -
Their very generous donations facilitated our work in Canada.

HOW YOU CAN HELP

IT TAKES A VILLAGE

You can help by fostering, adopting, volunteering, donating.

By sharing posts and newsletters, shopping cruelty free, writing letters to laboratories and Members of Parliament.

By being a voice for those with none.

THANK YOU

WE LOVE WHAT WE DO

It is because of YOU, our supporters, fosters, adopters, volunteers, donors – YOU, that we are able to save lives.

RESCUE is a privilege.

ADVOCACY is what we do to make sure rescue happens - and continues to happen.
